

What Can You Do?

HERE ARE A FEW TIPS TO HELP YOU BECOME A CLEAN WATER STEWARD

Only Rain Down the Storm Drain

Prevent pollution and flooding, never put anything down the storm drain.

Properly Dispose of Fats, Oils & Grease

Protect the sewer pipes in your home and community from overflows. No fats, oils, and grease down the drain.

Pick Up Pet Waste

Put it in the trash to prevent bacteria from washing into our waterbodies.

Put Trash in Its Place

Never litter. Reduce, reuse and recycle whenever possible.

Don't Over-Fertilize Your Lawn

Less is more. Follow label directions exactly and consider using organic fertilizer.

Get Involved

Volunteer for events like Trash Bash® (www.TrashBash.org). Educate your friends and family on how they can help. Join a watershed association to restore local waterbodies.
